

THE ALL-IN-ONE VR PLATFORM

Product overview

VIROO[®], 20 years culminating in a cutting-edge VR as a Service platform.

Virtualware's flagship platform, is redefining the realm of VR application development and deployment. Recognized for its pioneering approach in the immersive technology sector, VIROO[®] is rapidly becoming the global benchmark for multi-user VR applications.

The platform's strengths lie in its robust security features and unwavering commitment to quality and simplicity, ensuring operational excellence in every aspect. Virtualware's mission through VIROO[®] is to drive virtual reality adoption forward, leveraging innovative and sustainable strategies.

VIROO® offers a one-stop destination for enterprise VR

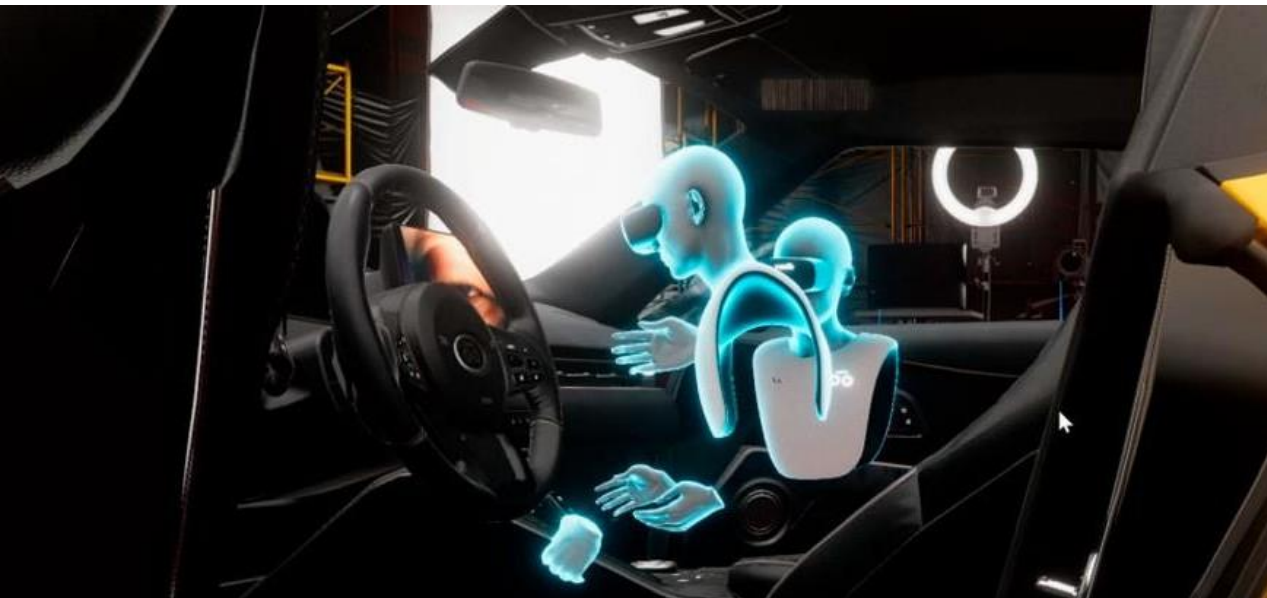

With a wide range of services, from VR content creation and remote collaboration capabilities to immersive room deployment, **VIROO® standardizes VR in one unified platform.**

Scale by creating multi-user VR content autonomously.

VIROO® provides a set of tools integrated into the Unity engine that allows users to produce multi-user and remote collaboration ready VR content without coding expertise.

Incorporate content creation capabilities in-house
Work with any Unity-based VR developers
Collaborate with trusted VIROO® Content Partners

Turn spaces into immersive collaborative VR rooms.

With VIROO® you can transform physical spaces into lifelike VR scenarios and explore your content in full-scale with multiple users interacting at the same time.

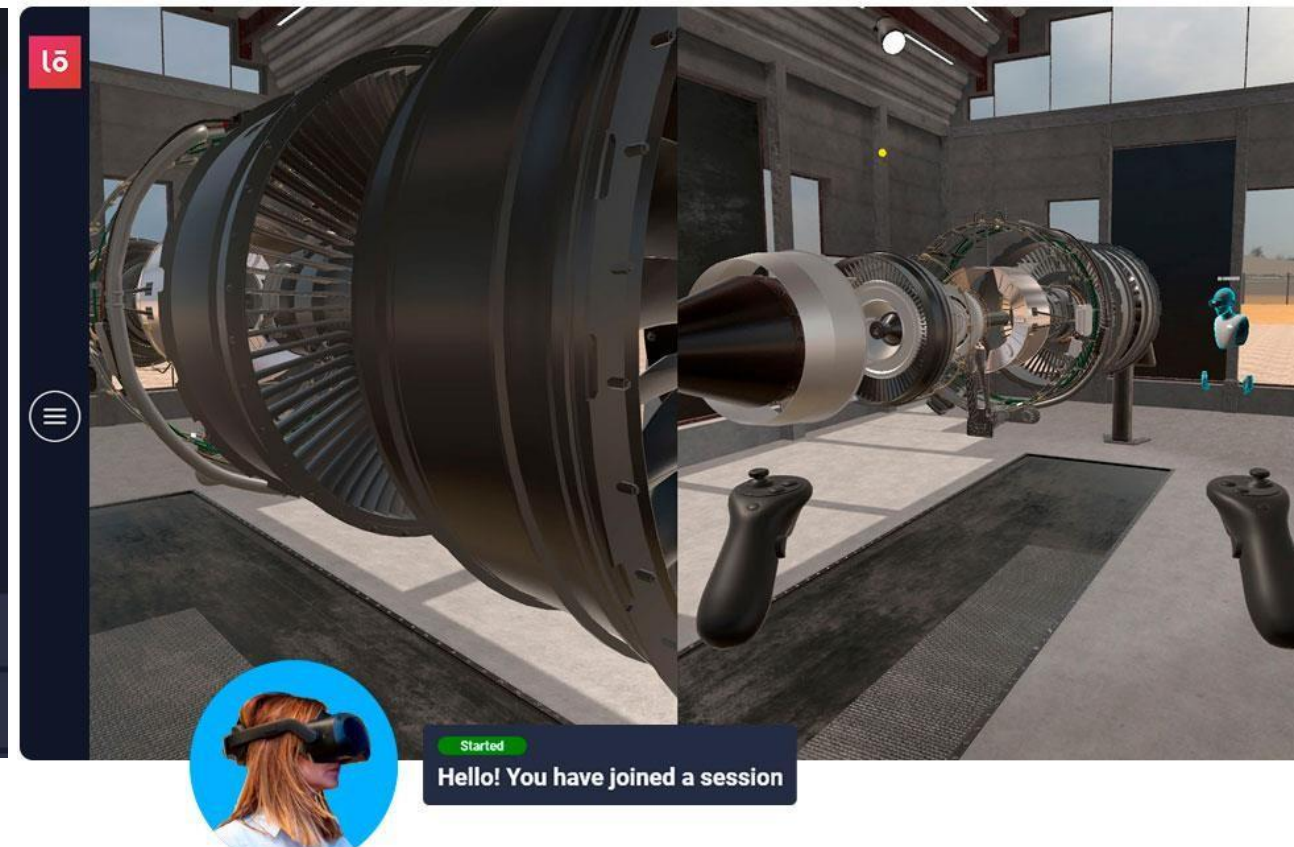

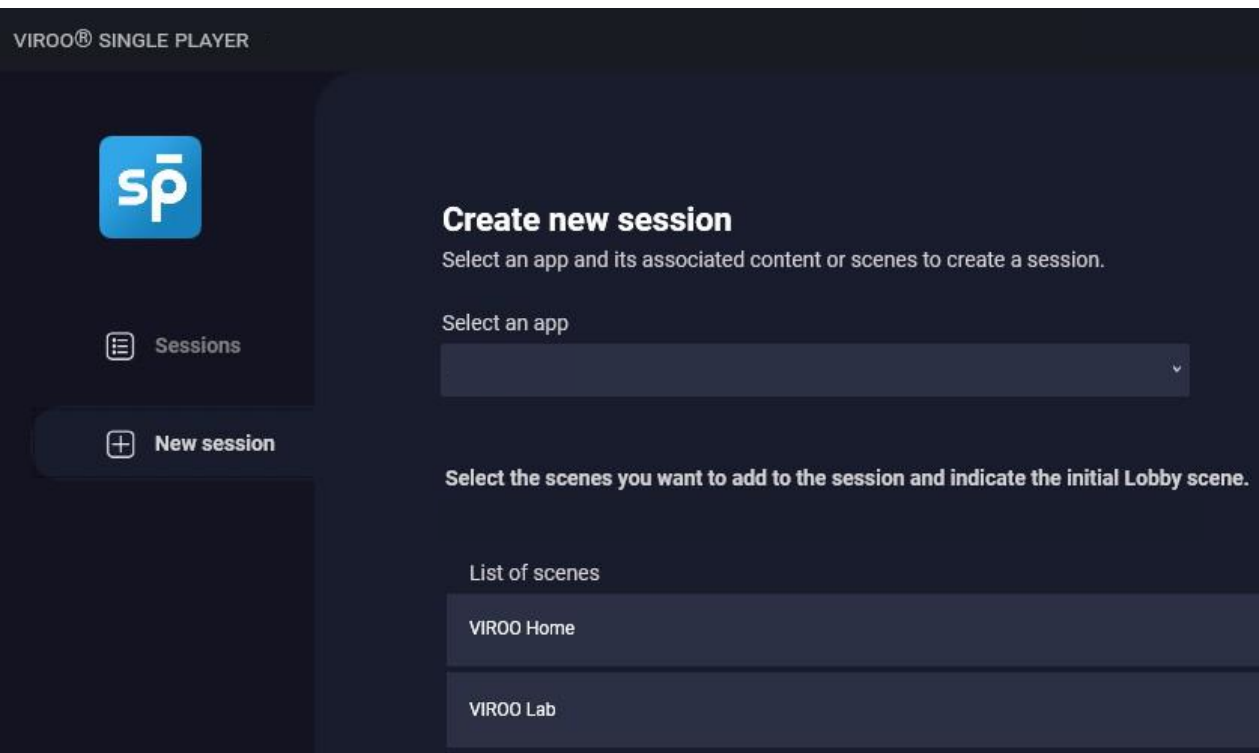

VIROO® is now compatible with multi-projection systems, such as CAVEs or similar.

The new VIROO® integration allows to deploy immersive multiuser content in Cave Automatic Virtual Environments. It manages hardware, sessions, and content, incorporating specific DTrack and MultiDisplay.

Connect and collaborate from anywhere, anytime.

VIR00®'s remote collaboration capabilities give you the power to connect and collaborate virtually with individuals and teams across the globe, regardless of geographical location or time zone.

The full potential of Virtual Reality and Mixed Reality combined

VIROO® Key Features

—
AWS and Azure cloud-based for easy accessibility and rapid scalability

—
Compatible with the latest VR headsets from HTC Vive, PICO or Meta

—
Integrated with multi-projection systems like CAVEs or Domes

—
Remote collaboration ready

—
Single and Multi-user mode

—
Access via Desktop, VR headset or Immersive Rooms

—
With built-in tools for VR content creation in Unity

—
Includes a set of VR apps to start exploring

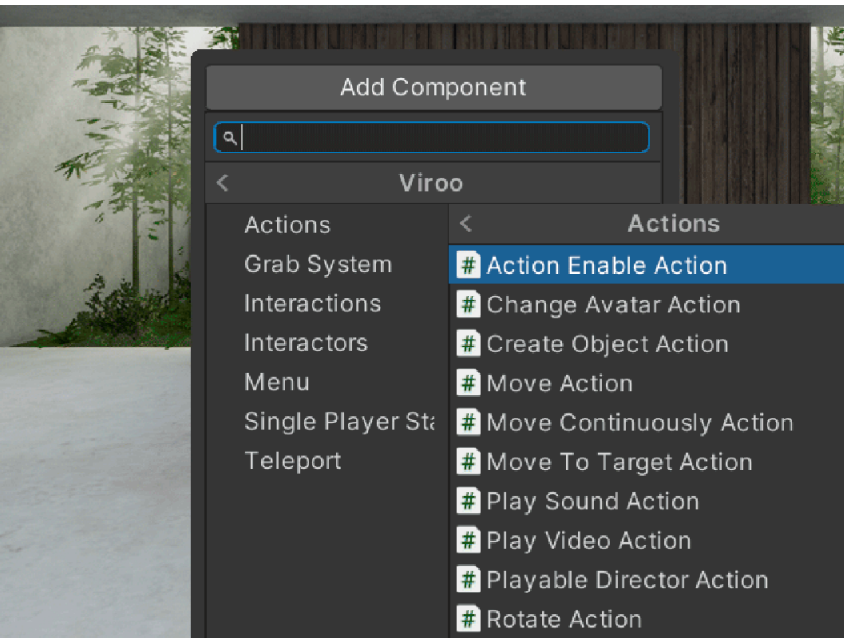

—
With Mixed-Reality capabilities

—
ISO 27001 certified for data protection and security

—
Open to integration of third-party devices and services

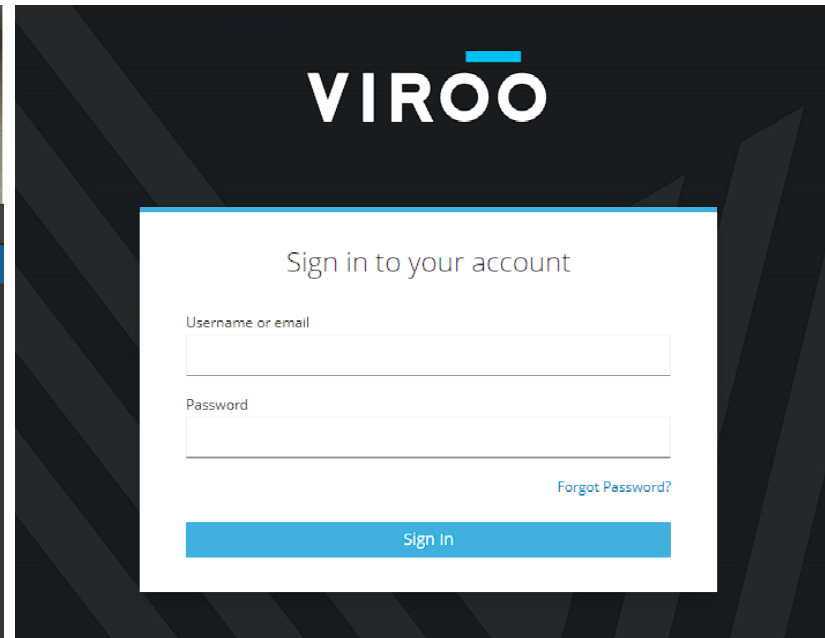

—
Designed for individuals of all skill levels

VIROO® Platform Components

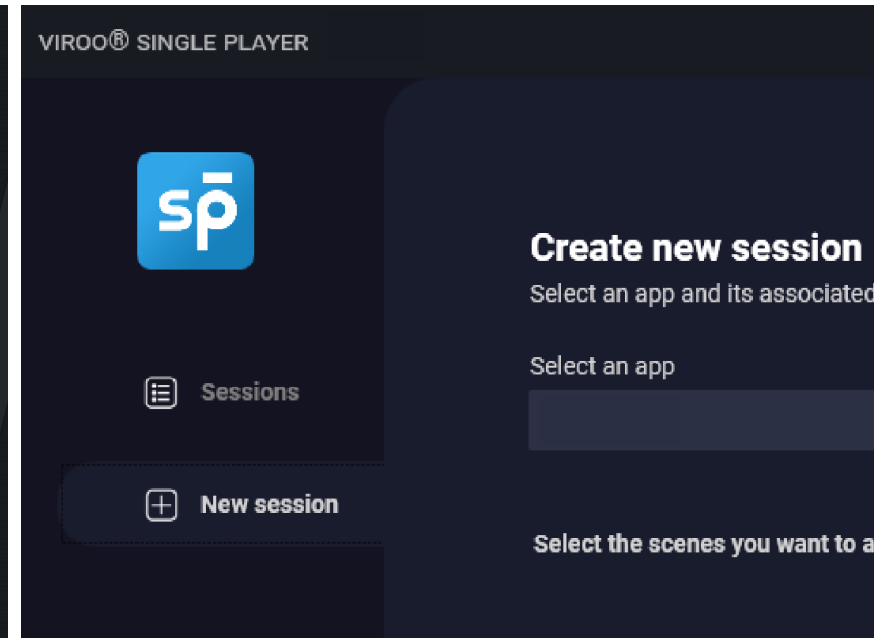

VIROO® Studio for Unity

Create multi-user and remote collaboration ready VR content without coding skills.

VIROO® Portal

Manage everything in one centralized place

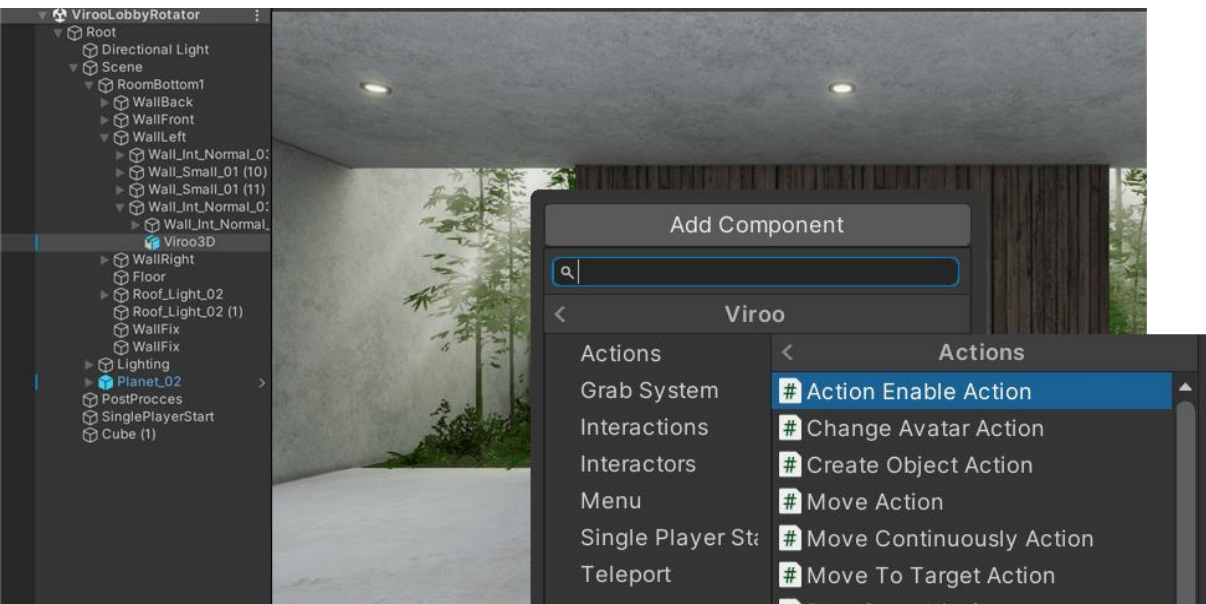

VIROO® Players

Deploy collaborative VR sessions across environments

Create multi-user and remote collaboration ready VR content without coding skills.

VIROO® Studio for Unity

VIROO® Studio empowers users to create powerful immersive content with ease, featuring an advanced validation control system to enhance the content creation process.

Low code approach to reduce the need for coding expertise.

VIROO® Studio simplifies the VR creation process by reducing the need for extensive coding knowledge. This inclusive philosophy allows individuals of diverse skill levels to unleash their creativity and bring virtual reality projects to life without being hindered by complex programming requirements.

Adaptable and flexible allowing coding-skilled professionals to easily extend its functionalities.

VIROO® Studio versatility ensures that those with coding expertise can seamlessly tailor and enhance the system according to specific needs and evolving requirements.

Relied upon the Unity Editor to ensure your project is available for the future.

VIROO® Studio is integrated into Unity Editor, the world's leading engine for creating and growing real-time 3D (RT3D) content. This ensures that your project is supported by the standard in the industry even if you stop using VIROO® Studio.

Manage everything in one centralized place.

VIROO® Portal

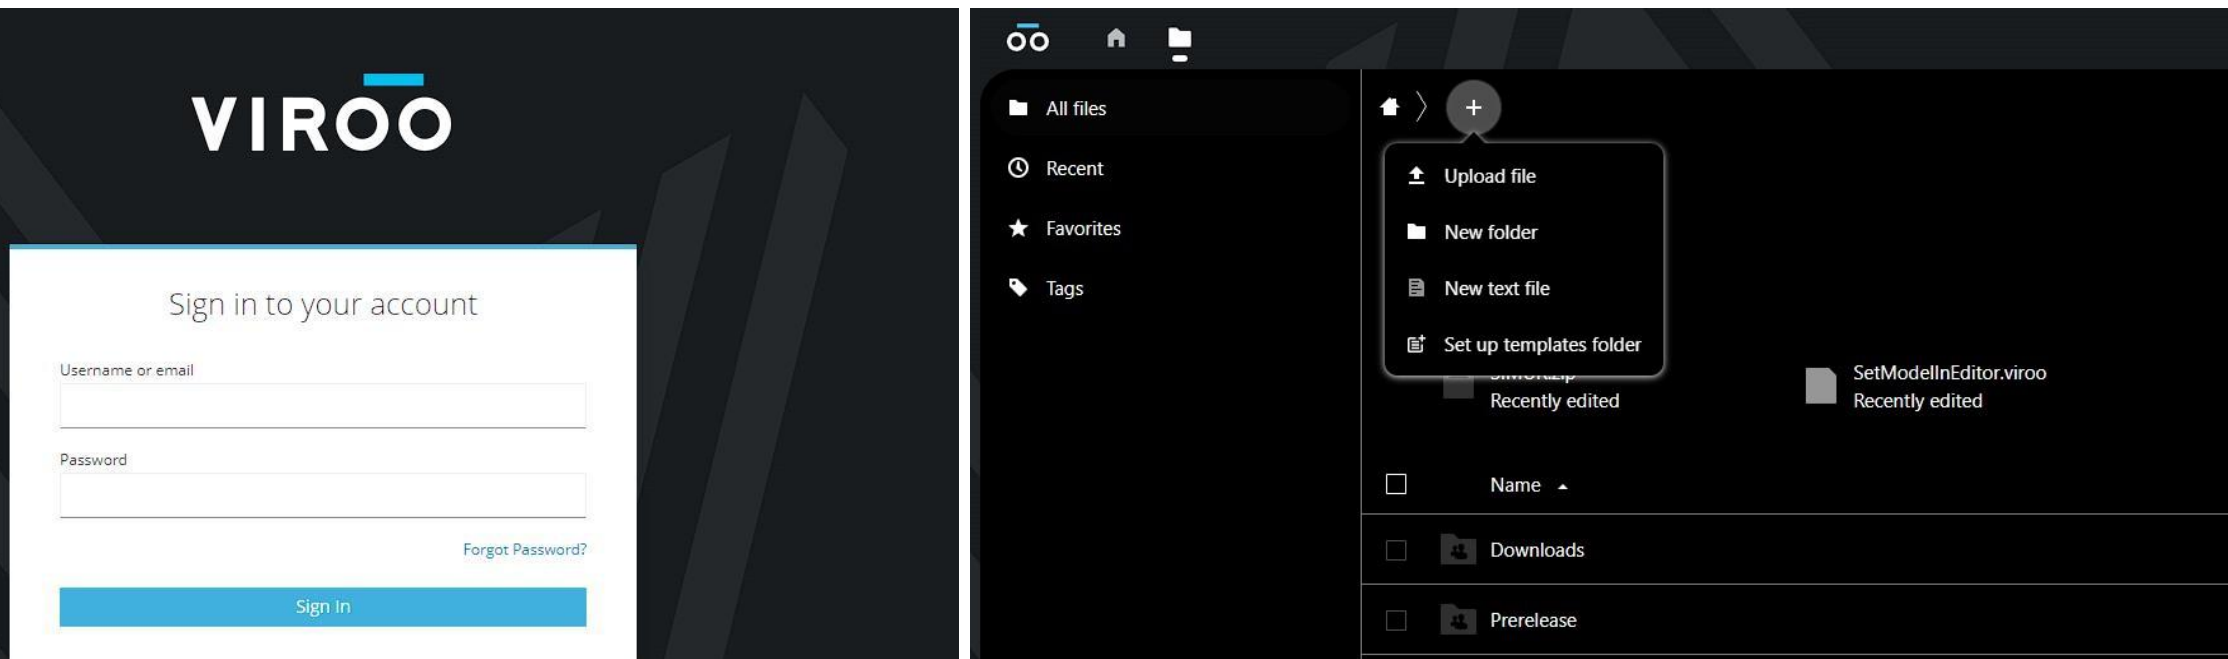

VIROO® Portal is the platform's content and identity management portal. It includes VIROO® support documentation, latest application versions and demo content.

Store your VR Content

Access to support documentation

Download VIROO® components

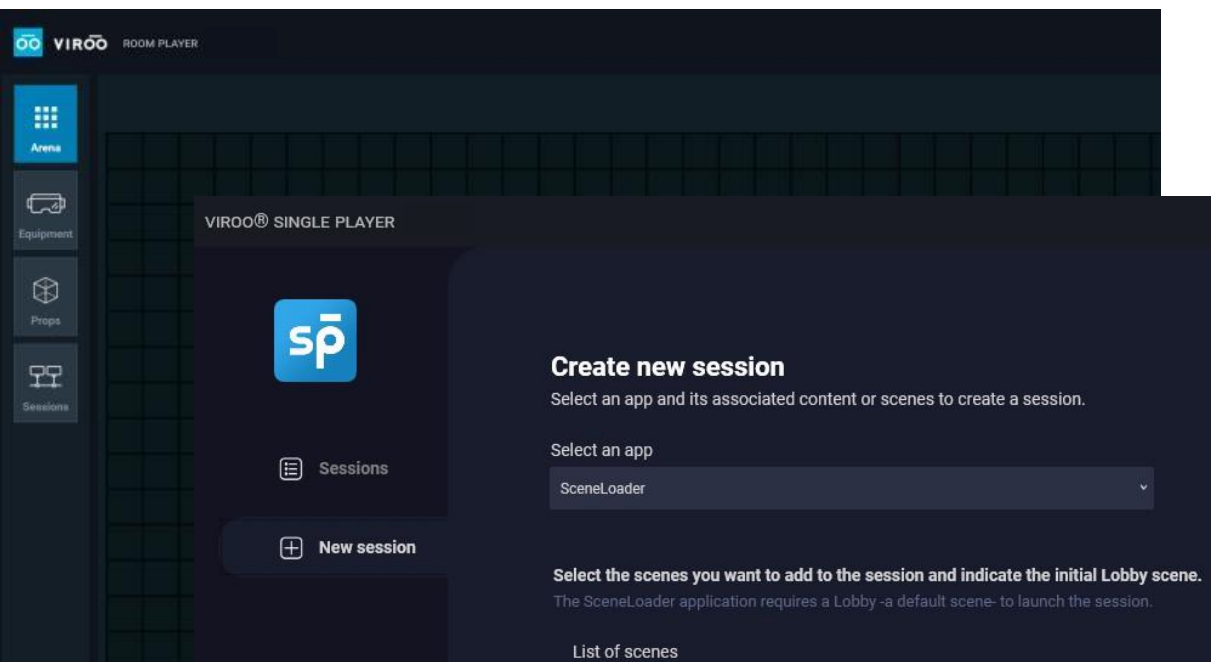

Manage your account settings

Deploy collaborative VR sessions across environments.

VIROO® Players

VIROO® Players deploy and run the immersive content across environments by creating remote collaborative sessions. The sessions can be accessed with any of the Players combined.

VIROO® Single Player

VIROO® Single Player allows users to consume immersive content on desktop computers, using mouse, keyboard or motion controllers, or using a VR headset.

VIROO® Room Player

VIROO® Room Player offers one of the distinguishing features of the VIROO® platform, as it enables applications to be deployed in VR immersive rooms.

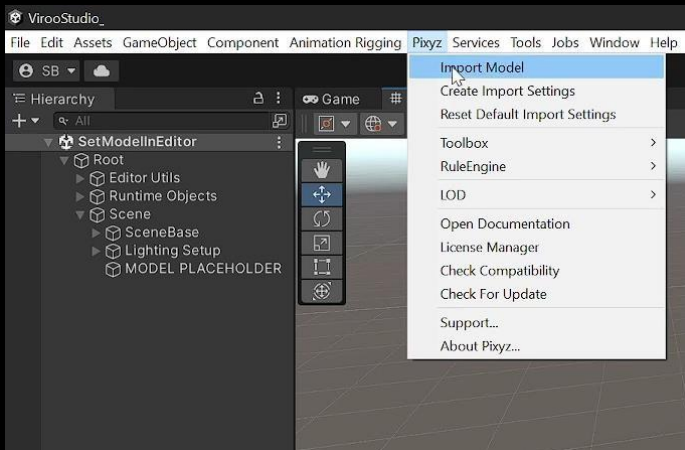

VIROO® Room Player manages the multi-user immersive content and hardware, all controlled from the room server. To achieve this, it works in conjunction with VIROO® Monitor applications, which run on each immersive workstation in the room.

VIROO® CAVE Player

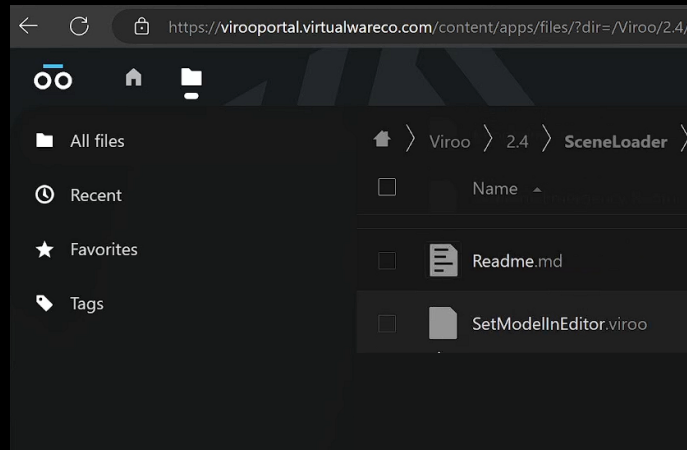

VIROO® CAVE Player enables the deployment of VR content in multi-projection systems such as Cave Automatic Virtual Environments or similar.

How VIROO® Works

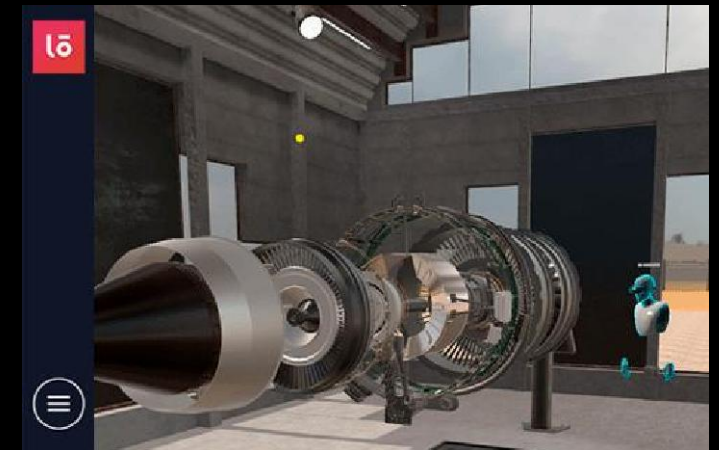

Create, manage and deploy multi-user VR content in 3 steps

Import and modify your content in Unity using VIROO® Studio built-in tools

Export and upload the content to VIROO® Portal and make it accessible from anywhere

Deploy VR sessions with your uploaded content through VIROO® Players

VIROO® subscription plans

Affordable and flexible subscription plans to encourage experimentation and reduce upfront costs. Whether you want to get started in VR or take it to the next level, there's a plan for you.

Features	Enterprise	Corporate
VIROO® floating licenses Number of concurrent users	>5	>5
VIROO® VirtualDesk Remote Support	Standard	Premium
Dedicated VIROO® Success Manager Support 8/5	—	✓
VIROO® On-Premises* VIROO® Platform in-full	—	✓
VIROO® Offline Possibility of running without connectivity	—	✓
VIROO® Single Player Player Desktop/VR de VIROO® - Acces from PCs/laptops	Unlimited	Unlimited
VIROO® Room/CAVE Player VIROO® Room Management or CAVEs Management	1	Unlimited
VIROO® Content Creation Consultancy** VIROO content creation support	—	✓
VIROO® Portal Content Storage*** Cloud-based hosting	Up to 1 TB	Up to 10 TB

*Dedicated IT infrastructure and capacity for management and operation of the platform is required (please consult).

**Maximum of 50 hours/year of consulting with experts in design and content generation in Unity and VIROO®.

***Additional content storage available upon request.

Ready to start? Let's make a plan.

Select the VIROO® plan that fits your needs

We're here to help you figure out what you need. If you're not sure about your future needs, you can start small and then expand when you're ready.

Start creating content and benefiting from VR

No matter if you're create your own content, prefer a company you already work with, or need content creation services, we've got your back and are here to assist you.

Set up the immersive VR rooms of your choice

We've got the services covered so that you can simply use them without any hassle or worry on your end.
